PROJECTS:

A. Sound Suppresstion Machine:
   Type: Hardware
   Description: Developing a hardware device that uses tiny bubbles to block sound inside water, which can help to reduce the sound of robots operating inside the water and make marine environments more convenient to live in.

B. V-Care Website
   Technology used: Html, CSS, Javascript
   Description: A website created with simple coding to educate people about depression and its effects, as well as to encourage them to schedule an appointment with a therapist who has been convenient.

C. Infonium Website:
   Technology used: Elementor, Wordpress, Slider Revolution, Adobe Photoshop.
   Description: Collaborated with graphic designers to create and redesign the client-supplied Corporate Scheme. The website describes the graduate assistantship by the client's company.

D. Geofluid Website:
   Technology used: Elementor, Wordpress, Slider Revolution, html, css, woo-commerce.
   Description: Using Elementor to provide an ecosystem in which companies can purchase hardware. The platform was built using the guideline given and edited to meet the clients ' needs using standard HTML/CSS.

E. Candorme Website:
   Technology used: Elementor, Wordpress, Slider Revolution.
   Description: The website was designed using the given reference framework, which would have been editable using WP-Bakery editor, so had to be remodeled using elementor to allow clients to simply adjust the material as desired.

F. Use Canva to Create Social Media Marketing Designs
   Type: Guided Project
   Description: This project involved an overview to Canva, determining the canvas size for a social media content, incorporating photographs unique to your company into some kind of social media post, and preparing a post for the social media platforms.

G.   Crime Free Bharat Portal Website
      Technology used: React.js, HTML, CSS, node.js,
      Description: We're working on a Web portal for the organisation that includes two-factor authentication, login registration, and all of the fundamental requirements including frontend, backend, and database. My role in this project is to work on the frontend.

H.   The Nature Wind Website:
      Technology used: HTML, CSS, BOOTSTRAP, DJANGO
      Description: I was working in the frontend part of the website from basic coding to making it responsive.
